

Final report

## S-Risk - Technical guidance document - annex IV

Cornelis Christa

Study accomplished under the authority of OVAM  
2013/MRG/R/76 – revision

May 2019

## REVISION HISTORY

Date	revision
28/02/2017	<i>Adding total number of hours on site for landuse type heavy industry (Table 10)</i>
15/05/2019	<i>Changes were made to the soil ingestion parameter values in Table 44. More background for the rationale behind these changes can be found in the <a href="#">Release Notes for S-Risk version 1.3</a>.</i>

## **Annex IV - Default values for the calculation of soil remediation values**

Parameter		Unit	Value
<b>SOIL</b>			
Soil type	-		Standard soil
Number of soil layers	-		1
Depth of groundwater table	m		3
OM (organic matter)	%		2
$\rho_s$ (soil bulk density)	kg/m <sup>3</sup>		1480
$\theta_w$ (water-filled porosity of soil layer)	m <sup>3</sup> /m <sup>3</sup>		0.2
$\theta_a$ (air-filled porosity of soil layer)	m <sup>3</sup> /m <sup>3</sup>		0.23
$\theta_s$ (total soil porosity of soil layer)	m <sup>3</sup> /m <sup>3</sup>		0.43
CL (clay content)	%		10
CEC (cation exchange capacity)	meq/100 g		10.8
pH-KCl	-		5
$\theta_{w,cz}$ (water-filled porosity of the capillary zone)	m <sup>3</sup> /m <sup>3</sup>		0.24
L <sub>cz</sub> (height of the capillary zone)	m		0.5
k <sub>v</sub> (air permeability of the soil layer)	m <sup>2</sup>		6.6E-13
Al (aluminium content)	mg/kg		1025
Fe (iron content)	mg/kg		2000
P <sub>tot</sub> (total phosphorus content)	mg/kg		1250
<b>GROUNDWATER</b>			
k (hydraulic conductivity of the phreatic groundwater layer)	m/y		365
i (hydraulic gradient)	m/m		0.001
L <sub>leach</sub> (length of the source area)	m		50
q <sub>u</sub> (infiltration in the vadose zone, unpaved area)	m/y		0.265
f <sub>u</sub> (fraction unpaved)	-		1
d <sub>a</sub> (thickness of the phreatic groundwater layer)	m		30
<b>DRINKING-WATER</b>			
drinking-water pipe material			polyethylene
depth of the drinking-water pipe	m		0.8
dt (stagnation time in pipe)	h/d		24
r (internal radius of the pipe)	m		0.0098
d <sub>e</sub> (thickness of the drinking-water pipe wall)	m		0.0027
L <sub>p</sub> (total pipe length through the contaminated area)	m		50
Q <sub>dw</sub> (daily drinking-water use)	m <sup>3</sup> /d		0.5
f <sub>g</sub> (fraction groundwater used as drinking-water)	-		0
<b>AMBIENT AIR</b>			
L (length of the contaminated area in dominant wind direction)	m		50
Z <sub>or</sub> (roughness length)	m		
• agriculture (II)			0.1
• residences with vegetable garden (III)			0.6
• day recreation (IVa)			0.1

	• holiday resort (IVb)	0.1
	• light industry (Va)	0.6
	• heavy industry (Vb)	0.6
Y	(breathing height)	m
	• plant	0.5
	• child	1.0
	• adult	1.5
h	(height for wind velocity $V_h$ )	m
$V_h$	(wind velocity at reference height h)	m/d
$k_{\text{Karman}}$	(von Karman constant)	-
T	(averaging time)	d
	• agriculture and residences (II, III)	6*365
	• recreation (IV)	6*365
	• industry (V)	45*365
$PM_{10}^{\text{soil}}$	(concentration of $PM_{10}$ resulting from soil)	$\mu\text{g}/\text{m}^3$
$EF_{PM10}$	(enrichment factor from soil so $PM_{10}$ )	-
<b>INDOOR AIR</b>		
building type		basement
concrete quality calculation option		gaps and holes
$L_{bs}$	(thickness of the buffer space)	m
$L_f$	(thickness of the floor of the basement)	m
d	(depth of the basement floor below soil surface)	m
$\Delta P_{si}$	(pressure difference between indoor space and soil)	Pa
$f_{of}$	(fraction of openings in the floor)	$\text{m}^2/\text{m}^2$
$n_f$	(number of openings per floor area)	$1/\text{m}^2$
$\eta$	(dynamic viscosity of air)	Pa.d
$vv_{i,b}$	(basic air exchange rate in the indoor space)	$1/\text{d}$
	• agriculture, residences, recreation (II, III, IV)	24
	• industry (V)	48
$A_f$	(surface area of the floor of the basement)	$\text{m}^2$
$A_w$	(surface area of the walls of the basement)	$\text{m}^2$
$V_i$	(volume of the indoor space)	$\text{m}^3$
$V_b$	(volume of the basement)	$\text{m}^3$
$L_{bw}$	(thickness of the basement walls)	m
$\varepsilon_{v,w}$	(air-filled porosity of the basement walls)	-
$k_{v,w}$	(air permeability of the basement walls)	$\text{m}^2$
$F_{\text{soil/settled dust}}$	(fraction of soil in indoor settled dust)	-
	• agriculture and residences (II, III)	0.5
	• day recreation (IVa)	0.25
	• holiday resort (IVb)	0.5
	• industry (V)	0.25
$EF_{\text{soil/settled dust}}$	(enrichment factor from soil to settled indoor dust)	-
$F_{\text{out/in}}$	(contribution of the concentration on ambient $PM_{10}$ to the concentration on indoor $PM_{10}$ )	-

<b>BATHROOM AIR</b>				
$V_w$	(water use during showering)	$m^3/h$	0.5	
$t_{sh}$	(duration of shower)	h	0.25	
$t_{br}$	(time spent in the bathroom after showering)	h	0.25	
$V_{sh}$	(volume of the shower stall)	$m^3$	2	
$V_{br}$	(volume of the bathroom)	$m^3$	15	
$T_{sh}$	(shower temperature)	K	313	
$t_f$	(time of fall for a drop)	h	2.78E-4	
$r_d$	(diameter of a drop)	m	5.0E-4	
$VV_{br}$	(ventilation rate in the bathroom)	1/h	3.3	
<b>PLANTS</b>				
$Q_{transp}$	(transpiration rate)	$m^3/m^2.d$	Table 1	
$V_r$	(root volume)	$m^3/m^2$	Table 1	
$\rho_r$	(density of the root)	$kg\ fw/m^3$	Table 1	
$\rho$	(density of the plant)	$kg\ fw/m^3$	Table 1	
$dm$	(dry matter content of the plant)	%	Table 1	
$L_{plant}$	(lipid content of the plant)	kg/kg	Table 1	
$a_{growth}$	(chemical elimination via growth)	1/d	Table 1	
$a_{metabolism}$	(chemical elimination via metabolism)	1/d	0	
$a_{photodegradat}$	(chemical elimination via photodegradation)	1/d	0	
$r_p$	(radius of the potato)	m	Table 1	
$\rho_w$	(density of water)	$kg/m^3$	1000	
$f_{ch}$	(fraction of carbohydrates in potato)	kg/kg	0.19	
$t$	(growth period of the plant)	d	Table 1	
A	(surface area of aboveground plant parts)	$m^2/m^2$	Table 1	
V	(volume of the aboveround plant parts)	$m^3/m^2$	Table 1	
$V_d$	(dry particle deposition rate)	$m/d$	865	
$R_n$	(annual rainfall)	$m/d$	2.2E-3	
$R_w$	(fraction retained after rainfall)	-	1.0	
$k_w$	(plant weathering constant)	1/d	4.9E-2	
$Y_v$	(plant yield)	$kg\ fw/m^2$	Table 1	
$W_c$	(volumetric washout factor for particles)	-	5E5	
$f_{eff}$	(fraction of soil particles taken up by the plant)	-	1.0	
R	(ratio of particles on the leaves to total weight of the plant)	g/g fw	5E-3	
<b>ANIMAL PRODUCTS</b>				
$t_{f,winter}$	(time fraction for winter diet)	-		
	• beef cattle		0.54	
	• milk cattle		0.54	
	• sheep		0.33	
$q_{soil,summer}$	(daily intake of soil particles in kg dm/d summer/winter)			
	• beef cattle		0.6 / 0.0	
	• milk cattle		0.6 / 0.0	
	• sheep		0.175 / 0.175	
$q_{pasture}$	(daily consumption of grass in kg dm/d summer/winter)			

	• beef cattle	0.0 / 0.0
	• milk cattle	7.918 / 0.0
	• sheep	1.8 / 1.8
$q_{grass,silage}$	(daily consumption of silage grass in kg dm/d summer/winter)	
	• beef cattle	0.0 / 0.0
	• milk cattle	4.298 / 7.537
	• sheep	0.0 / 0.0
$q_{maize}$	(daily consumption of silage maize in kg dm/d summer/winter)	
	• beef cattle	4.745 / 3.811
	• milk cattle	2.217 / 4.358
	• sheep	0.0 / 0.0
$q_{water}$	(daily intake of water)	$m^3/d$
	• beef cattle	0.067
	• milk cattle	0.067
	• sheep	0.006
$q_{concentrate}$	(daily intake of concentrate in kg dm/d summer/winter)	
	• beef cattle	2.61 / 3.314
	• milk cattle	0.257 / 2.346
	• sheep	0.0 / 0.63
$f_{local}$	(fraction of feed coming from contaminated area)	-
		1.0
$f_{c,water,gw}$	(fraction of groundwater for cattle)	-
		1.0
$f_{c,water,wp}$	(fraction of drinking-water for cattle)	
		0.0
chicken		no chicken
$q_{mixture,chicken}$	(daily consumption of feed mixture by chicken)	kg dm/d
		0.123
$q_{grass,chicken}$	(daily consumption of grass by chicken)	kg dm/d
		0.007
$q_{water,chicken}$	(daily intake of water by chicken)	$m^3/d$
		0.0002
$q_{soil,chicken}$	(daily intake of soil by chicken)	kg dm/d
		0.03
$f_{free-range}$	(fraction of free-range)	-
		1.0
$f_{ch,water,gw}$	(fraction of groundwater for chicken)	-
		1.0
$f_{ch,water,wp}$	(fraction of drinking-water for chicken)	-
		0.0
$f_{f,butter}$	(fat content of butter)	-
		0.85
$f_{f,milk}$	(fat content of milk)	-
		0.04

## EXPOSURE

exposure pathways by scenario

Table 2

BW	(body weight)	kg
	• 1 - < 3 y	12.3
	• 3 - < 6 y	17.6
	• 6 - < 10 y	26.8
	• 10 - < 15 y	44.4
	• 15 - < 21 y	62.5
	• 21 - < 31 y	68.5
	• 31 - < 41 y	70.5
	• 41 - < 51 y	71.0
	• 51 - < 61 y	74.0

	• $\geq 61$ y		72.5
IR <sub>soil/dust_daily</sub>	(daily ingestion of soil and dust)	mg/d	Table 3
F <sub>oral_soil</sub>	(fraction of soil in soil and settled dust ingestion)	-	Table 3
IR <sub>soil_hourly</sub>	(hourly ingestion of soil)	mg/h	Table 4
IR <sub>dust_hourly</sub>	(hourly ingestion of settled dust)	mg/h	Table 4
EF <sub>week</sub>	(exposure frequency on a weekly basis)	d/w	Table 5, Table 6, Table 7, Table 8,
EF <sub>year</sub>	(exposure frequency on a yearly basis)	w/y	Table 9, Table 10 Table 5, Table 6, Table 7, Table 8,
t <sub>out</sub>	(time spent outside)	h/d	Table 9, Table 10 Table 5, Table 6, Table 7, Table 8,
t <sub>in</sub>	(time spent inside)	h/d	Table 9, Table 10 Table 5, Table 6, Table 7, Table 8,
t <sub>sleep</sub>	(time sleeping)	h/d	Table 9, Table 10 Table 5, Table 6, Table 7, Table 8,
Q <sub>vegetable</sub>	(daily vegetable consumption)	g fw/d	Table 9, Table 10
Q <sub>veg_category</sub>	(daily consumption by vegetable category)	g fw/d	Table 11
f <sub>garden</sub> veg_category	(fraction of locally grown vegetables)	-	Table 13
Q <sub>beef</sub>	(consumption of beef)	g/d	Table 12
Q <sub>organ_meat</sub>	(consumption of organ meat)	g/d	Table 12
Q <sub>milk</sub>	(consumption of milk)	g/d	Table 12
Q <sub>butter</sub>	(consumption of butter)	g/d	Table 12
Q <sub>eggs</sub>	(consumption of eggs)	g/d	Table 12
f <sub>local</sub> animal_product	(fraction of animal product coming from location)	-	Table 13
Q <sub>drinking-water</sub>	(consumption of drinking-water)	l/d	
	• 1 - < 3 y		0.3
	• 3 - < 6 y		0.313
	• 6 - < 10 y		0.381
	• 10 - < 15 y		0.649
	• 15 - < 21 y		0.999
	• 21 - < 31 y		1.759

	• 31 - < 41 y	2.231
	• 41 - < 51 y	2.199
	• 51 - < 61 y	1.798
	• ≥ 61 y	1.590
RF <sub>drinking-water</sub>	(reduction factor for drinking-water consumption)	-
AF <sub>soil_skin</sub>	(average soil adherence on skin)	mg/m <sup>2</sup>
AF <sub>dust_skin</sub>	(average dust adherence on skin)	mg/m <sup>2</sup>
SA <sub>out</sub>	(skin surface area covered with soil during outside activities)	m <sup>2</sup>
SA <sub>in</sub>	(skin surface area covered with dust during inside activities)	m <sup>2</sup>
SA <sub>total</sub>	(total body surface area)	m <sup>2</sup>
